

## **MRO Energy Efficiency, Demand Response and Renewable Plans**

### **Energy Efficiency**

Ohio Edison, Toledo Edison and Cleveland Electric Illuminating (the Companies) are preparing to meet the requirements outlined in SB221. Currently, the Companies are gathering information about our customers efforts in this area to aid in determining how to best proceed and develop long term sustainable results at cost effective pricing. The Companies are also awaiting final rule making for implementation of SB221 from the PUCO as well as the outcome of the Companies ESP, MRO and Distribution Rate case proceedings for final development of programs and long term plans. As the Companies receive better information from our customers and from the PUCO, the information contained on this website will be updated to reflect our efforts and plans to meet the Energy Efficiency requirements of SB221.

### **Demand Response**

Ohio Edison, Toledo Edison and Cleveland Electric Illuminating (the Companies) are preparing to meet the requirements outlined in SB221. Currently, the Companies are gathering information about our customers efforts in this area to aid in determining how to best proceed and develop long term sustainable results at cost effective pricing. The Companies are also awaiting final rule making for implementation of SB221 from the PUCO as well as the outcome of the Companies ESP, MRO and Distribution Rate case proceedings for final development of programs and plans. As the Companies receive better information from our customers and from the PUCO, the information contained on this website will be updated to reflect our efforts and plans to meet the Demand Response requirements of SB221.

### **Renewable & Advanced Energy**

Ohio Edison, Toledo Edison and Cleveland Electric Illuminating (the Companies) are preparing to meet the requirements outlined in SB221. Currently, the Companies are gathering information about our customers efforts in this area to aid in determining how to best proceed and develop long term sustainable results at cost effective pricing.
